The Problem

India’s growing unemployment problem

India faces the ongoing challenge of unemployment, while many people struggle to find suitable work and stable income. At the same time, customers often find it difficult to connect with reliable workers for their everyday needs. The lack of an accessible, organized platform creates a gap between people seeking work and those who need services.

The Pain Points

01

Difficulty Finding Workers

Customers often struggle to find suitable, reliable workers when they need them.

02

Limited Access to Opportunities

Many workers depend on personal contacts or informal networks to find jobs.

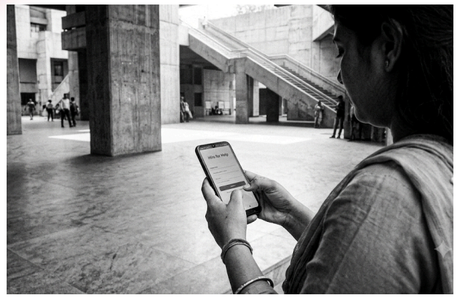
03

Lack of a Convenient Connection

Customers and workers may have difficulty connecting, agreeing on a job, and coordinating the work.

Our Solution

Step 1



Register

Step 2

Find a Worker

Step 3

Book a Service

Step 4

Complete the Job

Customers can use the digital platform to find suitable workers, while workers can create profiles, list their skills, manage availability, and receive booking requests.

The Business Model

01

Booking Fee

Charge a small platform fee for a successful booking.

02

Commission

Earn an agreed percentage of the service price for each completed booking over a certain threshold.

03

Subscription

Offer paid plans with additional features or promotional benefits to customers.

Thank You!
